PROFESSIONAL SUMMARY

Results-driven Credit Risk Specialist and Full-Stack Developer with over 10 years of experience in financial services and hands-on software development experience building responsive, user-focused web applications. Proficient in JavaScript, TypeScript, React, HTML5, CSS3, and Tailwind CSS, with strong practical experience in Git/GitHub version control and deployment via Vercel and Netlify. Combines a strong analytical, data-driven background from regulated banking environments with modern front-end development skills, including component-based architecture, responsive design, and API integration. Graduated with Distinction from Codespace Academy's Software Development programme, and currently completing an AI-Augmented Full-Stack Developer Programme (Melsoft Academy) as part of the SNPL, ranked 6th of the Top 25 selected candidates. The programme covers both front-end and back-end development, including Azure Fundamentals, Azure AI Fundamentals, Node.js, Next.js, SQL, and Supabase. Committed to continuous learning and actively exploring further study opportunities to keep building on technical skills in a fast-evolving technology field. Seeking to apply a unique blend of financial domain expertise and software engineering skills to a Junior Developer or Full-Stack Developer role.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, React, HTML5, CSS3, Tailwind CSS

Tools & Platforms: Git, GitHub, VS Code, Vite, Vercel, Netlify, Figma

Concepts & Practices: Responsive Web Design, Mobile-First Design, Component-Based Architecture, Custom React Hooks, RESTful API Integration, UI/UX Design Principles, Version Control & Collaborative Workflows (Git branching, pull requests)

Cloud & Backend (in progress): Azure Fundamentals, Azure AI Fundamentals, Node.js, Next.js, SQL, Supabase

CORE COMPETENCIES

Financial & Risk: Credit Risk Analysis, Client Portfolio Management, Regulatory Adherence, Financial Document Verification, Financial Data Analysis, Credit Risk Reporting, Risk Management

Professional: Analytical Skills, Communication Skills, Stakeholder Management, Problem Solving

TECHNICAL PROJECTS

House of Laundry — Business Website Redesign — *React 18, Vite, Tailwind CSS*

Client project for a Soweto-based laundry business | github.com/SIJABULILE-NCUBE

- Designed and built a full 7-page multi-page website for a real client (House of Laundry) after direct outreach and requirements gathering with the business owner
- Implemented a Cart Context for service selection and built laundry-themed CSS animations, including floating bubbles, a pegs-on-a-clothesline motif, and rising steam effects
- Built a dark mode toggle and a premium silver-and-charcoal visual identity tailored to the client's brand
- Delivered a complete project package including a brief, README, client outreach documentation, and a walkthrough video for handover

Podcast Discovery & Streaming App — *React, Vite*

Deployed via Vercel | github.com/SIJABULILE-NCUBE

- Built a podcast discovery and streaming app with custom React hooks for audio playback, favourites, listening progress, and theming (useAudioPlayer, useFavourites, useListeningProgress, useTheme)
- Implemented client-side routing with react-router-dom across Home, Show Detail, and Favourites pages, and scoped component styling with CSS Modules
- Solved a broken third-party audio API by engineering a placeholder audio fallback, keeping the player functional and the user experience uninterrupted

Neighbourloan — Neighbourhood Tool-Lending Marketplace — *React 18, TypeScript, Vite, Tailwind CSS*

Deployed via Vercel, Netlify & GitHub | github.com/SIJABULILE-NCUBE

- Designed and built a full front-end marketplace application enabling neighbours to list, discover, and borrow tools, using React 18, TypeScript, and Vite for a fast, type-safe development workflow
- Implemented a Trust Score system as a core product differentiator, informed by credit-risk assessment experience, to help users gauge borrower/lender reliability
- Identified and replaced potentially manipulative UX patterns (e.g., forced pre-browse sign-up, fabricated social proof) with transparent, user-first alternatives, documenting rationale in a decision log
- Managed version control and deployment pipeline using Git, GitHub, Vercel, and Netlify for continuous delivery

PROFESSIONAL EXPERIENCE

Specialist – Credit Risk | Absa Group Limited, Auckland Park, Johannesburg *September 2022 – Present*

- Review, approve, manage, and pay out credit limits (overdrafts, revolving loans, foreign guarantees, letters of credit, credit cards) within a Credit Mandate of ZAR 35 million
- Validate financial documents and securities to meet Conditions of Grant for Commercial and Business Banking clients
- Provide frontline support to Transactional Bankers, Relationship Executives, and Credit Analysts
- Manage and validate securities (collateral), including document validation and updates

Specialist – Risk (Credit Officer) | Absa Group Limited, Auckland Park, Johannesburg *August 2017 – August 2022*

- Managed a portfolio of Private Banking clients with an approval mandate of up to ZAR 5 million
- Conducted creditworthiness reviews, risk analysis, and product approvals across various credit products
- Collaborated with clients and stakeholders to resolve early-stage excesses and mitigate financial risk
- Used clients' historical financial data to forecast potential growth and sustainability
- Built and maintained strong stakeholder relationships across business units

Production Officer | Absa Vehicle and Asset Finance, Auckland Park, Johannesburg *March 2012 – July 2017*

- Managed contract amendments, application captures, and compliance with legal regulations (NCA, FAIS, FICA)
- Oversaw Absa Vehicle Finance and Ford Credit applications, ensuring adherence to contractual obligations and payout accuracy

Billing Support Consultant | Virgin Mobile South Africa, Sandton, Johannesburg *December 2009 – June 2010*

- Handled customer inquiries, account adjustments, and refunds, providing high-quality service support
- Processed documentation and updated customer databases to maintain billing accuracy

EDUCATION & CERTIFICATIONS

AI-Augmented Full-Stack Developer Programme

Expected Completion: November 2026

Melsoft Academy — SNPL Top 25 Selected Candidate, Ranked 6th

Software Development (HTML, CSS, JavaScript, React)

Completed 2026

Codespace Academy — Graduated with Distinction

HTML Essentials Certificate

Cisco Networking Academy — Completed

Artificial Intelligence in the 4IR

Completed 2026 (Certificate Pending)

University of Johannesburg

Advanced Diploma in Financial Markets (NQF Level 7)

Completed 2025

University of Johannesburg

Forensic and Investigative Auditing (NQF Level 6)

Completed 2019

University of South Africa

National Certificate in Banking Services Advice (NQF Level 5)

Completed 2013

Milpark Education, Johannesburg — Graduated with Distinction

Regulatory Examination Certificate (RE5)

Completed 2016

Moonstone, Johannesburg

Senior Certificate

Completed 2006
